

## Oceanis 41.1

Length Over All	12,43m - 40'9"
Hull Length	11,98m - 39'4"
Hull Beam	4.2m-13'9"
Light displacement	8777kg - 19,345lbs
Fuel tank capacity	200 l - 53 US Gal
Fresh water capacity	570l
Max Engine Power (Hp)	45HP
Year of build	2018

**Cabins 3**  
**Beths 6-8**  
**Heads 2**

### Oceanis 41.1

A direct legacy of all the owner experiences of a range that needs no introduction, the new *Oceanis 41.1* proves itself to be a distillation of performance and intelligence.

With the boldness of a 'best in class', the *Oceanis 41.1* embarks on a new era of performance and personalization. Built on a chined hull making her remarkably habitable, you can quickly distinguish her from her counterparts by a large stern accommodating the biggest cockpit on this size of boat.

The transom, closed to protect the boat during sailing, opens out automatically, converting into a huge aft swimming platform. This is an ingenious idea affording direct access to the sea without encroaching on the space and comfort of the helm stations.

On the *Oceanis 41.1*, sailing is comfortable and well-balanced thanks to a hull, designed by Finot Conq. With the mast now further aft, the sail plan is now optimal and she demonstrates outstanding speed and stability under sail.

With the minutest details lending themselves to personalisation, the lines of the *Oceanis 41.1* interior are airy and harmonious in all layouts. With a choice of woodwork, colours and lining materials, not to mention the number of cabins and shower rooms, there has been a considerable leap forwards on the *Oceanis 41.1* in the way it adapts to different crew configurations and lifestyles on board. The generous space in the owner cabin is worthy of a 45' cruiser and enables you to face the bed forward.
